

North of the grove

A mentor is a really inspiring Person to have around you. Especially when you are living without a mother or father. Sometimes It can be both parents you might not have. So who is that Person that will show you right from wrong? Well David the little kid was lucky to have a mentor to show him what's right so as he gets older so he won't end up unsuccessful and have a good path in life. It really inspired me because, when I was his age I really never had a mentor. The thing was I did have both parents but they will always be at work to support us and never have time for me so I would only be with friends and I guess it wasn't the right ones because look where I'm at right now! Imagine. I had a mentor I would most likely be in collage right now and have a career path. But since I been here in Boot Camp and have all these guest speakers talk to us and reading the book its time for a change and time to find a mentor to help me out so I don't go on the wrong path no more.
Excellent Book.
